More airports and air carriers are choosing Telos ID TSA-approved Designated Aviation Channeling (DAC) services.

- Expedited on-boarding with real-time and combined Criminal History Record Check (CHRC) and Security Threat Assessment (STA) submissions
- Reduced insider threats with Rap Back
- No up-front payments
- No hidden fees
- 24/7/365 dedicated customer care
- Reduced Personally Identifiable Information (PII) exposure and increased data integrity – no more spreadsheets
- Simplified web-based portal for efficient data entry
- Increased readiness with initial and recurrent training
- Unparalleled aviation security policy expertise and compliance assistance
- Confidence and security from Telos® ID – the premier choice in TSA DAC Services, FBI channeling, and federal identity solutions

Airports and air carriers using Telos ID DAC services enjoy increased security, data integrity, cost savings, and time savings.

TELOS ID – Proven Identity and credentialing solutions to meet the most stringent security requirements.

Telos Identity Management Solutions, LLC, is a leading provider of identity management services to the Department of Defense (DoD), the Federal government's national security community, and commercial enterprises.

Telos ID supports the Common Access Card – DoD's premier smartcard-based identification system – with over 2,400 biometric collection sites around the world. Millions of secure credentials are issued for active and reserve military under this program each year.

An experienced systems solution provider, Telos ID draws on an extensive track record supporting customers in customizing mission-critical solutions while adhering to government security standards. And, our IDVetting system provides enrollment and biometric collection capabilities for FBI channeling operations.

We invite you to switch to Telos ID DAC services today. Please contact Telos ID at dac@telos.com or 800-505-5144. Or reach out directly to Dawn Lucini, Telos ID's vice president for aviation security, at 703-724-3769.

SECURE

Meets DHS, TSA, and Federal Information Security Management Act (FISMA) regulations for collection, transmission, protection, and management of biographic and biometric data
